

The FCC is considering preempting state Telephone Privacy laws in favor of adopting one lower national standard. I am very satisfied with the current Indiana State Telephone Privacy law. Please do not reduce the protection I receive through Indiana's current system.

If I wish to do business with a company, I will contact them in my own way. I do not wish to hear the latest news from every company with whom I have ever done business, especially over the phone during undesired phone calls.

Please consider pursuing a anti-spam law for email instead of this new telephone privacy law. An anti-spam law that can be enforced would make everyone happy.
